

## INTERPOL Washington, U.S. National Central Bureau

### **Solution Architect Wyott Russell**

Wyott Russell serves as a Solution Architect for WFR Technologies supporting INTERPOL Washington, the United States National Central Bureau (USNCB). As a part of the WFR Technologies, Wyott's duties are to facilitate and implement Law Enforcement Information Sharing Programs. He has been the lead for both U.S. domestic and international INTERPOL related capacity-building programs. Wyott has been in this role since 2001.

During this time, Wyott has worked with U.S. Federal, State, Local, and Tribal law enforcement entities. He was directly involved in the U.S. domestic extension of INTERPOL tools and services to over 18,000 U.S. law enforcement and immigration entities.

In addition to maintaining his technical role with USNCB operations, in 2016 Wyott was selected to be a lead technical participant in Project Terminus, a U.S. International INTERPOL capacity-building program collaboratively established by INTERPOL Washington and the U.S. Department of State (DOS), Bureau of Counterterrorism (CT) to combat terrorism and transnational crime through the enhanced use of INTERPOL data.

Through Project TERMINUS, Wyott has engaged with and assisted several INTERPOL member countries in their efforts to leverage INTERPOL data to secure their borders and contribute to the global security effort.
